

Abundant Acres Farm

2010 Order Form

Thank you for choosing to support a local farm, this year we are offering grass fed burger. This burger is from our friends Larson Cattle Company of Pierce County. The animal has been reared on grass, without use of hormones or antibiotics. It will be harvested mid October and processed at Heritage Meats (USDA certified) in Rochester, WA.

Usual ground beef is the trim parts, we are offering you a better product! The whole animal---primals included will be ground. This will offer a better quality product and when compared to major retailers (usual price \$10/lb for grass fed burger) a sizable discount!

Price: \$6.50 per pound in 1 lb packages

We hope you share this with friends as well! Drops will be arranged for Seattle and Bellevue.

With thanks,
Brad
